West Tisbury, MA 02575

Mr. Peter Rodegast, Acting Chair

Dear Mr. Rodegast:

I received your letter on 28 Apr and reached out to Dave Smith, Fullers Energy. He and I spoke today and, as you know, he is very familiar with this issue. We contracted with Fullers in the summer of 2022 for solar energy, very much with the goal of having electricity that is protective of the environment. During the contract period with Fullers included their responsibility for approvals and permits. We selected Fullers based on the response from neighbors in Upper Makonikey who had utilized them and found them to be reliable, knowledgeable about our area and showing great concern for the environment.

In speaking with Dave Smith today he is immediately working on contacting an expert to assist in this situation. I know when we had some survey work done last year (far outside the buffer and wetland area) to look at a generator and the movement of the electric meter that the waiting list for a survey was at least six months. Therefore I would just urge caution regarding the ability to provide information from a wetlands specialist by June 1.

There is no more work on the property.

Please feel free to contact me.

Sincerely,

R.G. Kerlikowske
